

DIRECT-DRIVE

HPA Direct-Drive Energy Saving Blower Packages

Reduced Energy Costs - Less Maintenance - Fewer Components - Increased Blower Life

- Energy consumption by blowers is every treatment plant's largest utility expense.
- Belt drives create friction loss that equates to using as much as 10% more BHP (kW).
- Bearing life & blower life significantly increase due to eliminating side-load stress of a belt drive system.
- Eliminate belt maintenance & replacement costs.
- **Direct-Drive Pro-Pack** provides warranty insurance for your complete system.

- Paired with VFD controls, **Direct-Drive** will provide your client with design flexibility in addition to energy cost savings.

- Designed, engineered, & manufactured to your specific requirements & environment.
- On your next project, specify the **Hardy Pro-Air Direct-Drive Pro-Pack**.
