

# SOUND ENCLOSURES

**Pro-Closure** is a sound attenuating enclosure designed to meet the most demanding needs of industry, taking into account environment, economics, and process.

## A SOLUTION FOR EVERY APPLICATION

- Available as an engineered solution or for retro-fit
- Optimization of space
- Secure environment for equipment
- Easy access for maintenance
- Up to 18 dBA free field noise attenuation

## STANDARD DESIGN FEATURES

- Acoustically insulated steel sound panels
- Locking lift-off removable doors on all sides
- Durable powder coated steel panel design
- Convenient quick access inlet filter silencer
- Vented pressure relief valve
- Integral gauge panel
  - System pressure or system vacuum
  - Inlet filter restriction
  - Blower discharge temperature
- Power ventilation of enclosure
- Fresh air cooling for motor
- Common base with integral fork slots
- Timely service can be performed with easy access to change oil, air filters and maintain V-belt drives.

## CUSTOM ENGINEERED TO SPECIFICATION

- Specialty materials available
- Temperature control based on heat load calculations
- Engineering plans provided for project management
