

Rental Filters: An Economical Option for Your Short-Term Needs with No Long-Term Commitment

Aqua-Aerobic Systems' rental filters offer significant savings over the purchase of a new filter. The filters are an ideal solution when plant upsets occur, when existing filters need to be rebuilt, or to confirm that cloth media technology is suited for your application.

Features and Advantages

- Fully-assembled 6-disk (1.5 avg. - 3.0 max. MGD) or 12-disk (3.0 avg. - 6.0 max. MGD) models
- OptiFiber[®] chlorine-resistant pile cloth media offers maximum solids removal over a wide range of particle sizes
- Available in nominal 5 or 10 micron media
- Suitable for indoor or outdoor applications
- Filters are automatically controlled via PLC
- Rent-to-own option available
- Quick shipment with ease of installation
- Technicians available to assist with start-up
- Optional bench-scale testing prior to rental

Units ship fully-assembled and ready for operation

Internal components are assembled from 304 SS and non-corrosive materials for durability

Applications

- Industrial and Municipal Applications
 - Total Suspended Solids Removal
 - Phosphorus Removal
 - Reuse/Recycle
 - Side Stream Filtration
 - Tertiary Treatment
 - Turbidity Removal
